

IMatrix Standard Coding Explained

A word of explanation: When IMatrix (imatrix.infohio.org) was first designed there was no uniform coding for the Common Core Standards or the Ohio Learning Standards in Social Studies or Science. The following is the coding used in IMatrix. When standardized coding is available, IMatrix will revise the coding to the national standard. It is also important to note that IMatrix integrates the standards with the Dimensions of Inquiry. Only the standards that include inquiry have been included in IMatrix.

INFOhio IMatrix Research Planning Template

Use this template to plan a unit incorporating inquiry and Ohio Learning Standards resources. You can use it as a graphic organizer for individual or team brainstorming sessions on possible projects. The one-sheet format is also a great summary to share with administrators, curriculum directors, and other teachers.
